

[9r] My dear Lady Lovelace

I am in the middle  
of arranging my books and can  
only just get room to write a  
short note.

I received yours relative to the  
inquiry about the study of  
Math<sup>cs</sup> but did not answer as  
you would have left town and  
I did not know your country  
address.

I don't think you will want  
the 'Study of Math<sup>cs</sup>. The  
corresponding subject in the  
[9v] Algebra or Trigonometry will  
be what you want.

The continuity question  
you must consider well (because  
you will not allow yourself to  
skip) and perhaps your ultimate  
difficulties will not be  
altogether the same as those  
you commence with. The  
curve is laid down right  
and I have appended  
a remark to what  
I return.

Yours very truly  
ADeMorgan

69 G.S.

[10r] I have now returned to town.  
My wife is gone to Highgate  
for a fortnight
